

PROJECT BRIEF

Sidetick — Website Build (3 pages)

Trading education brand. Indian market. Built from scratch.

ABOUT THE BRAND

Sidetick is a systematic trading education brand for Indian retail traders. We teach TradingView-to-broker automation (Pine Script, Dhan API). Our flagship product is Mini Quant — a 22-hour, 11-module course with automation scripts. I have ~40K Instagram followers and a warm WhatsApp/Telegram audience of ~5K. The website needs to convert warm leads and house course content post-purchase.

PAGES NEEDED

Page 1 Course landing page

- Sales page for Mini Quant
- Razorpay payment button + checkout integration
- On successful payment: automatically grant access to the member portal (via Razorpay webhook)

Page 2 Gated member portal

- Only accessible to paying students — no public access
- Frictionless login
- Course videos hosted directly on our server or third party tool
- Videos must be streamed (not downloadable) — no right-click save, no direct URL exposure,
- Module/lesson navigation with progress tracking
- Piracy protection is a hard requirement

Page 3 Freebies page

- Publicly accessible — Need to Enter WhatsApp number to access for FREE
- Lists free resources (Pine Script templates, strategy guides, etc.)
- Each freebie has a short description + download/access button
- Doubles as a lead magnet / trust-building page

DESIGN & TECH REQUIREMENTS

Design theme	Payment gateway	Video hosting	Platform preference
Light, clean, trustworthy	Razorpay (India)	Self-hosted on our server or third party tool	Open to AI - Recommend what's fastest

WHAT I NEED FROM YOU (BEFORE WE START)

1. Your platform recommendation (WordPress, Webflow, custom, etc.) and reasoning
2. How you'll handle video streaming + piracy protection — this is the most critical technical piece
3. How Razorpay payment success will automatically provision access to the member portal
4. Portfolio samples of membership/gated content sites you've built before
5. Realistic timeline estimate

WHAT I'LL PROVIDE

- Brand assets — logo, colors, fonts
- All written copy for each page
- Course videos (uploaded to server once portal is set up)
- Razorpay API credentials
